

Knots and hair tangles are all too common and it can be a lengthy and painful process to remove them. Knots and tangles are caused when two hairs wrap around each other and become intertwined. Once a couple of hairs become intertwined the knot can become bigger and harder to remove. Strands of hair are shed every day from the scalp as part of the natural hair cycle. If these strands are damaged, then they will not readily fall away and will cause knots to form. Knots may also form through rubbing of the hair against certain surfaces such as towels, sheets and pillowcases.

Here at Nativis, we have developed an oil-free stay-in conditioning hairspray that lubricates and coats the surface of hair strands to facilitate easy detangling and minimise knot formation. It is oil-free and 100% natural in composition, containing a natural active ingredient derived from Sericin which we have called Silk Hydra-Fix®. This active ingredient will coat the hair strands to provide a smooth outer surface, allowing knots to be easily brushed out. It will also give the hair an increased shine, increase hydration and strength so that breakage is significantly reduced. Regular use of the stay-in hair conditioner should significantly reduce knots and significantly improve overall condition.

#### Silk Hydra-Fix Conditioning Hairspray

#### Directions for Use - Spritz Liberally into Damp/Dry Hair

1. Spritz liberally into damp (not wet) or dry hair. For thick/long hair try to spritz through layers so that all strands are coated. Once applied, massage the hair to distribute the spray as evenly as possible.
2. Brush the hair from the scalp to the ends. Brushing should be very easy and painless. Knots should readily disappear and breakage of hair minimal.
3. Allow to dry naturally.
4. Repeated brushing should be very easy throughout the day if required.

**Price £21.00**

Use the above procedure on dry hair or on hair that has been washed and then dried to a damp state. Brushing and detangling should be much easier immediately after using for the first time. Continued use will provide additional benefits which include a smoother and softer feel to the hair, increased strength with less hair loss due to breakage, increased shine and bounce. The stay-in Hair Conditioner is skin friendly and will also have hydrating and moisturising benefits to the scalp. It is oil-free and 100% natural in composition.
