

Clean skin is fundamental in maintaining our skin in a healthy state. Our skin is an organ of elimination, secreting toxins on its surface which need to be removed before they contribute to skin problems which include spot breakouts (blackheads and whiteheads) and inflammation. Other contributory factors that can give rise to skin issues include make-up application, sunscreens and pollutants, all of which should be removed on a regular basis to prevent skin congestion. Because we have a range of different skin types, we produce different levels of natural oils (called sebum) in our skin. This can cause dirt, dead skin cells and pollution to build up around and inside our skin pores. Having clean skin means that it will function more efficiently, fewer skin irritations will be experienced and it will absorb treatment products more efficiently.

Here at Nativis, we have developed a Body Mist that acts as an exceptionally good facial cleanser. It is 100% natural in composition, and contains a natural active ingredient derived from Sericin which we have called Silk Hydra-Fix<sup>®</sup>. This active ingredient deeply hydrates and moisturises the skin. It also has strong anti-bacterial and anti-microbial properties which will help to prevent bacteria from generating whitehead spots on our skin. Having no harsh ingredients (Alcohols or drying agents), it will cause no irritation with repeated regular use for cleansing purposes. It can also be used around the neck and ears to remove the negative effects that can be caused by pollutants. Positive results should be observed using the products described in this package after 1-2 days at most and skin condition should improve significantly.

## Products for Hydrating Cleanser

### Silk Hydra-Fix Body Mist (200g)

#### Directions for Use - Cleansing Face, Ears and Neck

1. Apply the Body Mist liberally to the face, neck and ear region by spraying from a distance of 20-30 cm. It is perfectly safe to apply to the eyelids, nose, mouth and ear regions.
2. Once applied, take a clean cotton pad and gently wipe in one direction to remove make-up and any pollutants that might have been absorbed onto the face during the day. It may be necessary to use 2-3 cotton pads to fully remove make-up and cleanse the skin. Repeat the spray-wipe procedure if necessary, to remove heavy make-up use.
3. Performing the cleansing action with the cotton pads around the neck and ears also to remove pollutants.

**Price £18.00**

Use the above procedure in the evenings before sleeping. The body mist has a strong cleansing action and will not dehydrate or irritate the skin. It will actually hydrate the skin deeply and also provide moisturisation in addition to removing pollutants and toxins which can otherwise cause sensitisation of the skin and spot formation.
